Projects

I have worked on a diverse range of software development projects, including **e-commerce platforms**, **management systems**, and **CRM solutions**. I have developed robust websites and apps for e-commerce, streamlining operations with management tools, and enhancing customer engagement through CRM systems. Additionally, I've built specialized applications like **food delivery platforms**, **wallet apps with secure payments**, and **marketplace solutions** connecting buyers and sellers. My mobile development experience includes **finance tracking** and **language translation apps**, providing users with practical tools for managing finances and overcoming language barriers. I've also developed **course management systems**, personal **websites**, **social media platforms**, and **chatting apps**. I specialize in both mobile and web development, focusing on creating secure, user-friendly, and functional solutions.
